DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-4, drawn to dynamic reconfiguration of grid managers in a grid computing environment, classified in class 709, subclass 226.
- II. Claims 5-13, drawn to establishing communication control channels between interconnected services, classified in class 709, subclass 226.

Inventions 1-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In the instant case, invention I has separate utility such as grid management including dynamic reconfiguration of resource allocations by grid managers. Invention II has separate utility such as a web services infrastructure wherein web services are dependent upon other web services, and the creation of communication channels between dependent web services. See MPEP 806.05(d).

The inventions are distinct from eachother because of the following reasons:

- a. These inventions have acquired separate status in the art as shown by
- their different classifications.

Application/Control Number: 10/712,155 Page 3

Art Unit: 2141

b. The search required for the two inventions would not be co-extensive because the groups would require different searches on the USPTO's classification class and subclasses as follows:

The group I search would require the search of dynamic reconfiguration of resource allocations in a grid computing environment utilizing grid managers, as classified in class 709 subclass 226. The group I search further would require the search of network computer reconfiguring as classified in class 709 subclass 221.

The group II search would require the search of the establishment of communications channels between interconnected services in a general shared resource environment, not limited to a grid computing configuration, as classified in class 709, subclass 226. Additionally, the group II search would require the search of computer to computer connection establishing and parameter setting as classified in class 709 subclasses 227-228.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GRANT FORD whose telephone number is (571)272-8630. The examiner can normally be reached on 8-5:30 Mon-Thurs alternating Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on (571)272-3880. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
